SAFE

The Daay Bin Paddle Sweep is engineered to the most current specifications in the industry. The sweep has no dangerous augers and simply moves the grain with flexible rubber paddles.

DURABLE

Explosion proof, all-weather quick change motors and foam-filled, run-flat, tractor tread tires are just a couple of the quality products used to create the Daay Bin Paddle Sweep. The Sweep is designed to be fully submersed in grain, and can be manufactured to fit in bins up to 105' in diameter.

AFFORDABLE

With the flexible rubber paddles, almost all of the grain is swept from bin floor with the Daay Bin Paddle Sweep. The Sweep also makes for less auger sweep injuries, unnecessary entry into bins, and insurance claims!

FEATURES:

- **5,500** BPH maximum capacity.
- **Starter boxes included** with every package.
- Non-jack system allows for **minimal entry** once Daay Bin Paddle Sweep has been started.
- Tires are designed to slip to keep the sweep from climbing the grain pile. This **allows the sweep to clean very close to the floor**.
- Housing is made out of 10 gauge material.
- **Explosion proof motor**.
- E**lectric motor is protected** from commodities within the bin by a steel cover.
- Adjustable chain and motor mounts.
- **Weight kits for increased traction** on the drive wheels come standard on all sweeps.
- Pivot sections on sweeps over 24' in length allows sweep to **follow the contour of floor**.
- Dual drives on sweeps over 30' in length.
- Triple drives on Sweeps over 39' in length.
- Torque limiting ratchet on all tractor drives.

Edition 01/2019

"I have been in the grain industry for 27 years. I have never had a sweep that meets our needs like the Daay Paddle Sweep. It moves the grain in a very gentle and efficient manner. The Daay Sweep design, I feel, is the safest sweep on the market.

We love the sweep because of the ease of use, our employees have minimal entry into the bin and we have very little clean up when the bin is empty. Since we purchased the Daay Sweep it has allowed our company to empty larger bins more often. We no longer worry about breakdowns and costly repairs. Our employees are very pleased and look forward to us installing them in every bin."

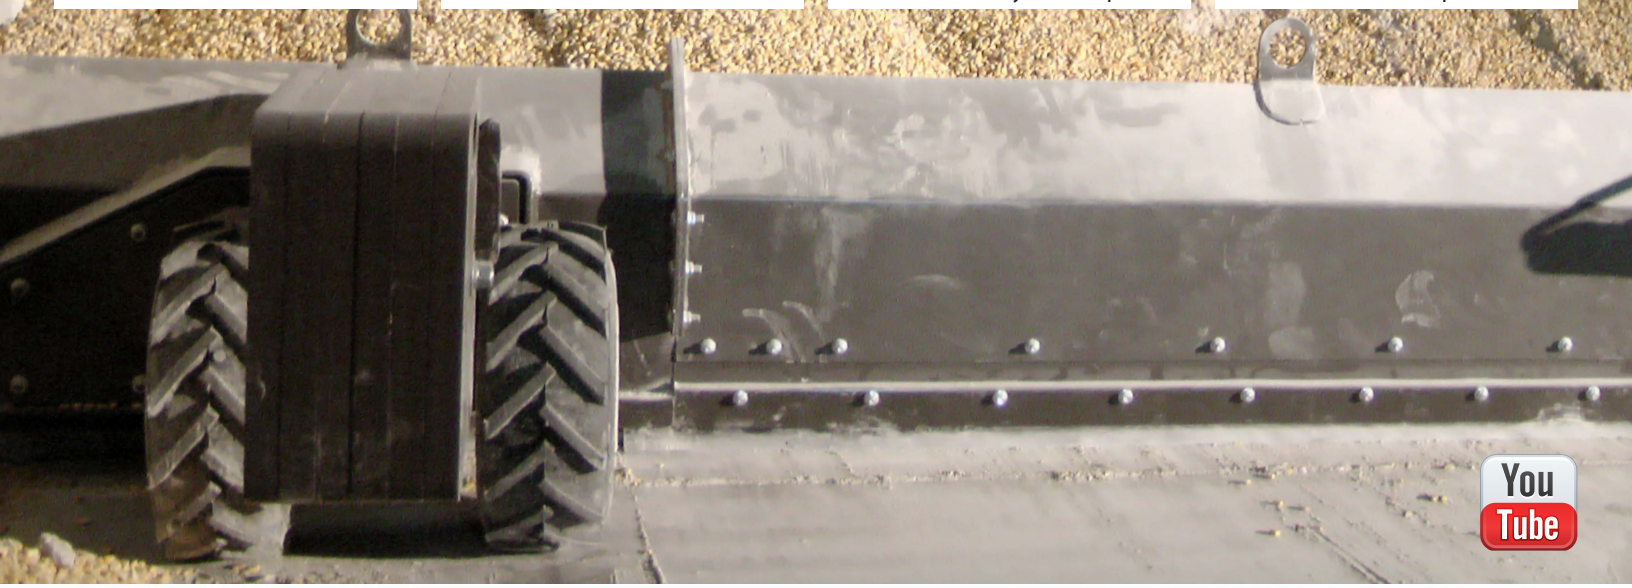
-Scott Foushee, Poinsett Rice and Grain, Jonesboro, AR

Can Withstand An Avalanche Of Grain!

Tires Are Foam Filled, With Tractor Tread.

Flexible Rubber Paddles Move Grain Gently To Sump.

Carries As Much Grain As The Job Requires.



"As an operation's manager for a large co-op with multiple locations I need to look at safety, quality, and value when purchasing grain handling and storage equipment. When our team discovered the Daay Bin Paddle Sweep back in early 2010, I first found it somewhat hard to believe. After we tried our first one, I was a believer. We've purchased about a dozen since then and spread them throughout our locations."

"We were very impressed with how the sweeps performed in our hybrid rice. They required virtually no help to keep feeding, making emptying our bins much easier, faster, and safer than with our old auger-type sweeps."

-Darrell, St. Joseph, LA

"Safety is our number one concern at our operation. It is virtually impossible to get hurt by the Daay Sweep. Besides safety, another great advantage is how it performs. If you run it around the bin twice it virtually gets all the grain. Every other bin sweep we used left 2" to 3" on the bin floor we had to deal with. We love our sweeps."

-Tom Fields, Fields Farm Partnership, McCroy, AR
